

## Aerospace Project Manager

*Rise to the challenge...* International Water-Guard Industries Inc. (IWG) is the dominant supplier of flight qualified water treatment equipment to the corporate jet market, and the developer of the patented aircraft circulating potable water system.

IWG is seeking an experienced aerospace professional with strong project management skills. This Project Manager will;

Report to the Vice President of Engineering and be a key member of the engineering team responsible for managing multiple projects concurrently.

Plan projects with appropriate input from DAR's, Transport Canada and other aviation authorities as a fundamental part of this role.

Participate in defining project scope, deliverables, budgets and schedules for each project.

Drive projects to completion by ensuring effective delivery and approval of deliverables, identifying risk issues and developing mitigation plans.

Participate actively in selected engineering in addition to managing projects.

This person will be a team builder who has a demonstrated track record of delivering projects on time, and on budget.

### REQUIREMENTS

The Project Manager must have at least an undergraduate degree in engineering, preferably aeronautical or mechanical. Candidates with additional training in project management or business will be given priority.

A solid background or training in Aviation STC (certification) process is desired.

A history of building good working relationships with major OEM's and regulators is beneficial.

The candidate must have a hands-on approach to resolving problems.

### Previous Work Experience

The Project Manager will have a minimum of 5 years of experience in the Aerospace Industry, with 3 or more years of project management experience, ideally in small fast-growing companies.
