

## IWG announces unveiling of its new IWG T-Series Tankless Water Heater

20<sup>th</sup> October, 2014

**Burnaby, BC, Canada** – IWG Technologies, Inc. (IWG) is pleased to announce that its subsidiary, International Water-Guard Industries Inc. (IWG-I), has launched its latest Tankless Water Heater for the VIP aircraft marketplace. IWG is proud to have Greenpoint Technologies Inc. as its launch customer for the **T-Series** heaters which have been designed to meet the demanding challenges of new generation business aircraft and VIP aircraft such as the Boeing B-787 and Airbus A350.

Tankless Water Heaters, also known as on-demand water heaters, play an important role in VIP aircraft potable water systems by providing continuous and unlimited hot water to showers, galleys, lavatories and appliances. IWG-I's heaters reliably supply continuous hot water with no recovery time, communicate with cabin management systems, and take up much less space than heated tank systems. The **T-Series** line will be offered in a complete range of power sizes for high performance heating with flow rates of 0.5 to 4 gallons per minute.

Gerald Eiers, Vice President, Business Development for IWG-I stated “The **T-Series** heater meets the highest levels of environmental qualification and tough operational requirements of the latest generation executive aircraft. These new units will round out IWG-I's offering of Tankless Water Heaters with price, performance and features to meet a wide range of customer requirements.”

“The introduction of the smallest, lightest and smartest water heater in the market is a testament to IWG-I's dedication to meet the needs of our customers. The company continues putting key technology building blocks in place for our next generation products.” stated IWG-I's President Darryl Jacobs.

The company will be unveiling this new range of tankless water heaters during the National Business Aircraft Association (NBAA) annual conference and tradeshow which runs October 21-23 in Orlando, Florida.

IWG Technologies, Inc. is the public holding company for International Water-Guard Industries Inc., a Canadian aerospace company focused on aircraft potable water treatment, water systems, water heaters and components. IWG has expertise in all aspects of water treatment, has the products and know-how to provide high quality water for passengers and crew, and lightweight, space-saving solutions for the aircraft operator.
