News Release

AIRBUS CORPORATE JET CENTRE INSTALLS FIRST IWG CIRCULATING POTABLE WATER SYSTEM ON AN A319 ACJ.

Sept 11th, 2008

Burnaby, BC, Canada - International Water-Guard Industries Inc. (IWG), is pleased to announce that this fall, the Airbus Corporate Jet Centre Toulouse, France will put its first IWG Circulating Potable Water System (C-PWS™) on an A319 ACJ.

“We are very pleased that Airbus’s own Corporate Jet Centre will be the first to install a Circulating Potable Water System on an A319,” said David Fox, IWG’s president & CEO. “We will provide equipment and engineering support to complete the integration of our patented water system design on this project.”

This version of the C-PWS augments system pressurization with continual circulation of water by aviation water pumps, providing protection from freezing and consistent water pressure and flow. The C-PWS also includes IWG’s NPS-A6 Water Treatment Unit to eliminate the threat from harmful bacteria and viruses.

International Water-Guard is a Canadian aerospace company focusing on aircraft potable water treatment and full water system solutions. IWG has expertise in all aspects of water treatment, and has the products and know-how to provide high quality water for passengers and crew, and light weight, space saving solutions for the aircraft operator.

This news release contains certain forward looking statements that reflect the current views and/ or expectations of IWG with respect to its performance, business and future events. Such statements are subject to a number of risks, uncertainties and assumptions, which may cause actual results to be materially different from those expressed or implied. Except as required under applicable securities legislation, IWG assumes no future obligation to update these forward looking statements.
