News Release

IWG COMPLETES MOVE TO NEW FACILITY

6 February, 2006

Burnaby, BC, Canada - International Water-Guard Industries Inc. (IWG) is pleased to announce that it has completed its move to a new 11,700 square foot facility. The premises (Unit One – 3771 North Fraser Way) houses IWG's manufacturing, engineering, R&D and administration, with access to further space as growth requires.

Prior to moving in, IWG conducted extensive modification of the space, which now includes specialized manufacturing and testing areas as well as a dedicated engineering research and development lab.

“Over the past year, IWG has transformed itself into an all new, aerospace focused company, and this facility is the culmination of that process,” said David Fox, IWG's President and CEO. “Following last years financial restructuring and return to profitability, we conducted a full rebranding, and now, by moving into a purpose-built facility, we are extremely well positioned to capture the many opportunities in aerospace water treatment and systems.”

International Water-Guard is a Canadian aerospace company focusing on aircraft potable water treatment and full water system solutions. IWG has expertise in all aspects of water treatment, and has the products and know-how to provide high quality water for passengers and crew, and light weight, space saving solutions for the aircraft operator.
