## MIDCOAST AVIATION BUYS WATER SYSTEM ASSEMBLIES FROM IWG

September 22, 2008

*Burnaby, BC, Canada* - International Water-Guard Industries Inc. (IWG) is pleased to announce that it is commencing supply of complete water system assemblies to Midcoast Aviation of Cahokia, IL.

"The extension of our relationship with Midcoast to the supply of complete water system assemblies is a vote of confidence in the capability of IWG as an aircraft system supplier," said IWG President & Chief Executive Officer David C. Fox. "We have been supplying our water treatment units for several years. With our expanded engineering capabilities and AS9100 certification, progression to the system level was a natural for us."

The assemblies or "pallets" are Midcoast's own design. "Supporting a completion center on a build-to-print basis is a new direction. With the current pressures on aircraft delivery, we are able to use our special water system expertise in supporting the completion industry to accelerate production. This capability can only be provided by a fully qualified supplier such as IWG," says Fox.

Initial deliveries will begin in early 2009.

Midcoast Aviation, an affiliate of the Jet Aviation Group of Companies, is a full-service AS9100-certified aircraft maintenance, modifications and completions provider. Midcoast provides a full spectrum of services, including maintenance; avionics; electrical and mechanical engineering; avionics design and integration; interior design; airborne office, information and entertainment systems; hand-crafted cabinetry; custom upholstery; composites; sheet metal; state-of-the-art downdraft paint facility and certification. Midcoast has recently completed a new 145,000-sq-ft hangar to support narrow body completions, which brings the company's hangar space at St. Louis Downtown Airport near St. Louis, Missouri, to nearly 650,000 sq ft. For more information about Midcoast, visit [www.midcoastaviation.com](http://www.midcoastaviation.com).

International Water-Guard is a Canadian aerospace company focusing on aircraft potable water treatment and full water system solutions. IWG has expertise in all aspects of water treatment, and has the products and know-how to provide high quality water for passengers and crew, and light weight, space saving solutions for the aircraft operator.
