

The heat is on – the IWG T-Series, never wait for hot water

IWG's T-Series is a family of 5, 8, 9, 10, 12, 15 and 18kW On-Demand water heaters for high-capacity applications such as showers, galleys, bidets and executive vanities.

The IWG T-Series is the only high-capacity water heater that runs on three phase 115 VAC 400 HZ and 115 VAC wild frequency power. It's also the lightest and most compact heater of its type - tipping the scales at around 18.5 lbs (8.5 kg) its over 10 lbs (4.5 kg) lighter than some equivalent units.

#1970

With accurate and stable temperature control even at very low flow, multiple plumbing configurations allowing the integrator greater flexibility, a pre-heat function, provisioning for a remote power switch, and RS485 communications, the needs of the modern VVIP Aircraft and Business Jets are met by the innovative T-Series.

The T-Series has been certified on many VVIP/Head-of-State platforms including Boeing 787, 737 & 747, Airbus A320 & A350 as well as various Business Jet platforms. For retrofit, IWG has designed the T-Series to easily replace any obsolete Keltech and IWG ES7 heaters.

With over 150 T-Series in-flight today backed by our outstanding customer service, come visit us at booth 1970 (West Hall) to find out how the T-Series can fit your needs.
