## IWG DISPLAYS NEW BBJ DRAIN MAST AT NBAA – KEY COMPONENT OF THE IN-FLIGHT DRAIN SYSTEM

October 19, 2010

**Burnaby, BC, Canada** - International Water-Guard Industries Inc. is displaying its new Dual-Port Drain Mast for the Boeing BBJ in booth 5027 at the NBAA show in Atlanta, Georgia, according to President & CEO David C. Fox.

The dual-port mast is a key component of our new in-flight drain system for the BBJ, Fox said. Our in-flight drain system is designed to ensure that a BBJ can land with a purged water system, it eliminates the risk of ground freezing in cold climate operations, and alleviates the need for crew to wait around . sometimes for hours . to drain the aircraft on arrival.

For ease of installation and operation, we have designed a dual port drain mast for both potable and grey water on the same mounting as the single port rear grey water mast for the standard BBJ, he pointed out.

International Water-Guard is a Canadian aerospace company focusing on aircraft potable water treatment and full water system solutions. IWG has expertise in all aspects of water treatment, and has the products and know-how to provide high quality water for passengers and crew, and lightweight, space saving solutions for the aircraft operator.
