

News Release

IWG'S NPS-A6 WATER TREATMENT UNIT TO BE STANDARD INSTALLATION ON GULFSTREAM BUSINESS JETS

October 27, 2003

Burnaby, BC, Canada - International Water-Guard Industries Inc. (IWG) is pleased to announce that its patented NPS-A6 aircraft potable water treatment unit has been approved for use by Gulfstream Aerospace Corporation for final phase installation on Gulfstream G500® and Gulfstream G550® business jets.

The NPS-A6 is IWG's newest aircraft water treatment product, and combines carbon filtration with ultraviolet disinfection to provide clean, fresh tasting water that is free of microbial contamination. IWG produces four models of aircraft potable water treatment devices, and more than 800 units are flying on virtually every type of business jet and privately registered airliner worldwide.

"This is a significant milestone for us," said Bill Coote, IWG's President and CEO. "More and more attention is being paid to water quality on aircraft, and it is gratifying to be working closely with a long-term customer and industry leader like Gulfstream."

Founded in 1958, Gulfstream Aerospace Corporation, a wholly owned subsidiary of General Dynamics (NYSE: GD), is The World Standard™ in business aviation. The company has produced more than 1,300 aircraft for corporate, government, private and military customers around the world. The company's flagship products -- the Gulfstream G100®, the Gulfstream G150®, the Gulfstream G200®, the Gulfstream G300®, the Gulfstream G400®, the Gulfstream G500®, and the Gulfstream G550® -- are the world's most technologically advanced business jet aircraft. More than one-quarter of Fortune 500™ companies operate Gulfstream aircraft.

International Water-Guard Industries Inc. is a Canadian water treatment company providing total water treatment solutions to aviation, industrial/commercial, and residential customers throughout the world. Services include water treatment needs analysis, system design/assembly, and ongoing support. IWG has expertise in all aspects of water treatment, including advanced filtration, ultraviolet disinfection, reverse osmosis, deionization, etc.
