IWG ANNOUNCES AGREEMENT WITH EMBRAER FOR INSTALLATION OF UV WATER TREATMENT UNIT OPTION ON THE LEGACY 600 AND 650.

14 February, 2012

Burnaby, BC, Canada – International Water-Guard is pleased to announce the signing of a Letter of Agreement with Embraer SA of Brazil for the optional installation of the IWG-A4 ultraviolet water treatment unit on Embraer Legacy 600 and Legacy 650 aircraft.

“This is an important milestone for both IWG and Embraer,” said David Fox, IWG’s president & CEO. “For us, this is the beginning of a formal relationship with a very important and growing airframe manufacturer. For Embraer, this marks the introduction of active ultraviolet water treatment as a product option for their business jets. This will allow passengers and crew to benefit from a unique water-borne contamination protection system, wherever they are in the world,” he added.

The first installation will be of an IWG-A4 water treatment unit on Embraer’s demonstrator Legacy 650 aircraft in San Jose dos Campos, Brazil. The installation has been designed by International Water-Guard, and their Brazilian partners Avionics Services of Sao Paulo. It will be authorized under an ANAC STC, which will be followed by an FAA STC. The package will then be available for order for “green” Legacy 600/ 650 aircraft as well as retrofit, and may be ordered through Embraer Business Jets as well as International Water-Guard.

International Water-Guard Industries Inc., is a Canadian aerospace company focusing on aircraft potable water treatment, water systems, heaters and components. IWG has expertise in all aspects of water treatment, and has the products and know-how to provide high quality water for passengers and crew, and lightweight, space saving solutions for the aircraft operator. It is the operating subsidiary of IWG Technologies, listed on the TSX venture exchange as IWG.
