IWG AEROSPACE WATER SYSTEM EXPERTS

For over 30 years IWG has been introducing innovative technologies to make water safe on aircraft.

IWG-UVL1

A lightweight, low power and easy to install water disinfection component that makes point of use water disinfection a reality.

With the UVL1, IWG introduces its first UV-C LED component, continuing our role as the aviation industry's leader in water treatment devices for aircraft.

The UVL1 is brought to you by IWG, the only aerospace company focused solely on water system solutions.
